DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 3, 11 and 17 the term "its" does not define the meets and bounds of the invention.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 3-22 are rejected under 35 U.S.C. 112, first paragraph, because the best mode contemplated by the inventor has not been disclosed. Evidence of concealment of the best mode is based upon that the disclosure does not contain any subject matter disclosed in the claims. It is impossible for one skill in the art to understand and the applicant novelty/invention.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3661

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 3-22 are rejected under 35 U.S.C. 102(b) as being anticipated by the applicant disclosure.

See page 3, lines 30-34, applicant discloses that is old and well known to solve the power optimizing problem utilizing well known optimization algorithm. Therefore, the method for optimizing power full vehicle as claimed in claims 3-22 is considered to be old and well known.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Matty et al (4,235,402) discloses a train vehicle speed control apparatus.
